1.1 Overview

A brief description about your project

1.2 Purpose

The use of this project. What can be achieved using this.

2 Problem Definition & Design Thinking

2.1 Empathy Map

Paste the empathy map screenshot

2.2 Ideation & Brainstorming Map

Paste the Ideation & brainstorming map screenshot

3 RESULT

Final findings (Output) of the project along with screenshots.

4 ADVANTAGES & DISADVANTAGES

List of advantages and disadvantages of the proposed solution

5 APPLICATIONS

The areas where this solution can be applied

6 CONCLUSION

Conclusion summarizing the entire work and findings.

7 FUTURE SCOPE

Enhancements that can be made in the future.

8 APPENDIX

A . Source Code

Attach the code for the solution built.

1 INTRODUCTION

1.1 Overview

Financial performance is a subjective measure of how well a firm can use assets from its primary mode of business and generate revenues. The term is also used as a general measure of a firm's overall financial health over a given period.

Analysts and investors use financial performance to compare similar firms across the same industry or to compare industries or sectors in aggregate.

KEY TAKEAWAYS

The financial performance tells investors about the general well-being of a firm. It's a snapshot of its economic health and the job its management is doing.

A key document in reporting corporate financial performance is Form 10-K, which all public companies are required to publish annually.

Financial statements used in evaluating overall financial performance include the balance sheet, the income statement, and the statement of cash flows.

Financial performance indicators are quantifiable metrics used to measure how well a company is doing.

No single measure should be used to define the financial performance of a firm.

1.2 Purpose

For internal users, financial performance is examined to determine their respective companies' well-being and standing, among other benchmarks. For external users, financial performance is analyzed to dictate potential investment opportunities and to determine if a company is worth their while.

Before calculations can be made on certain financial indicators that establish overall performance, a financial statement analysis must occur.

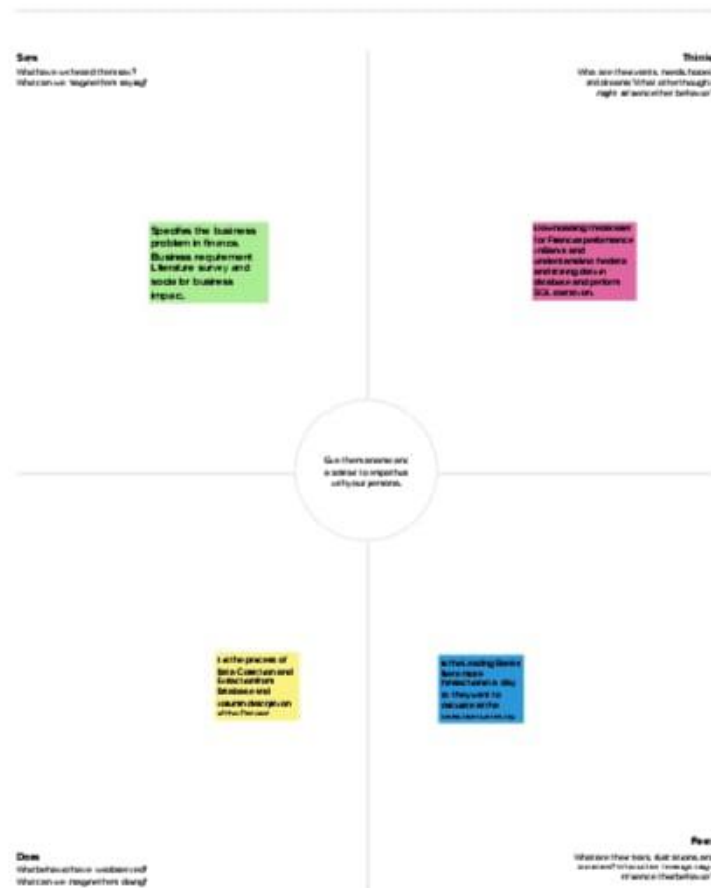

2 PROBLEM DEFINITION & DESIGN **THINKING**

2.1 Empathy Map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

[Show template feedback](#)

The information you add here should be representative of the observations and research you've done about your users.

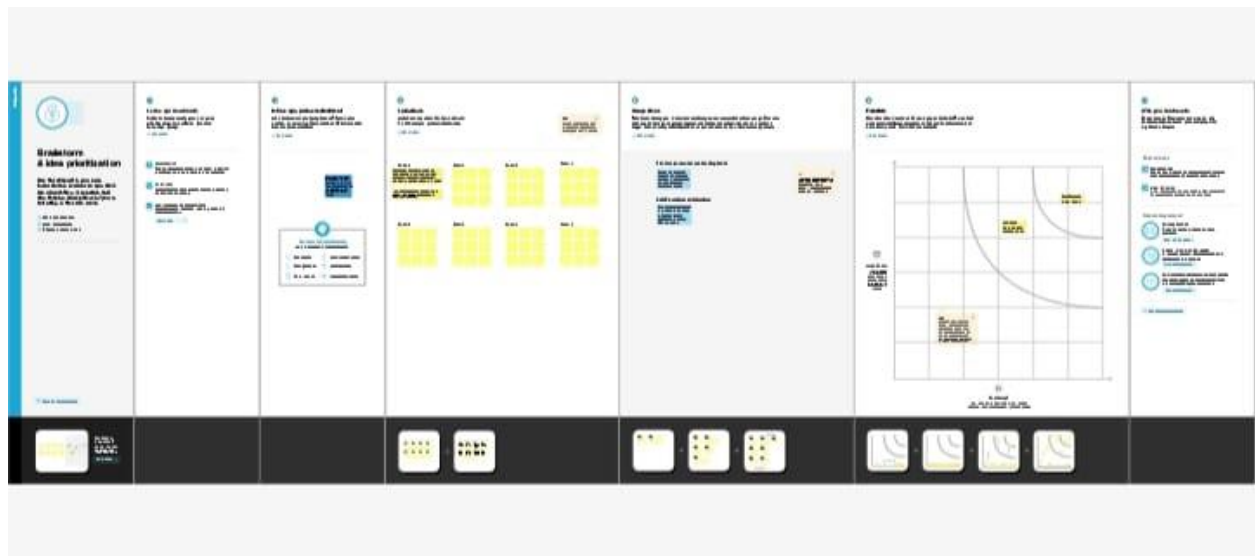

Avant de commencer les préparations?

Donnez à l'animal un bon bain de soleil et laissez-le se réchauffer pendant 15 à 20 minutes.

Après les préparations

2.2 Ideation & Brainstroming Map

3 RESULT

4 ADVANTAGES & DISADVANTAGES

Advantage:

A Chance to Budget Outline

Another advantage of using financial statements for future planning and decision making is that they show the company's budgets. The budgets reveal how much wiggle room the company has to spend on launching products, developing marketing campaigns or expanding the current office size. Knowing how much money is available for planning and decision making ensures that the company does not spend more than expected.

Disadvantage:

Based on Market Patterns

One disadvantage of using financial statements for decision making is that the data and figures are based on the market at that given time. Depending on the market, it may change quickly, so executives should not assume that the numbers from a previous financial statement will remain the same or increase. Just because a company has sold 5 million copies of a product during one year does not guarantee it will sell the same amount or more. It may sell much less if a competitor releases a similar product.

5 APPLICATIONS

A financial performance analysis examines the company at a specific period in time—usually, the most recent fiscal quarter or year. The balance sheet, the income statement, and the cash flow statement are three of the most significant financial statements used in performance analysis.

Financial ratios can be computed using data found in financial statements such as the balance sheet and income statement. In general, there are four categories of ratio analysis: profitability, liquidity, solvency, and valuation.

Standard cash flow statements will be broken into three parts: operating, investing, and financing. This financial statement highlights the net increase and decrease in total cash in each of these three areas.

6 CONCLUSION

The data analysis is very important, simple and basic project for any machine learning students. Every student should be through with the top 100 banks dataset. This dataset can be done by many banks all over the countries in the world. Overall in this article, we have seen mainly we focused on data visualization. Finally it classified and we analysis the leading banks using their performance in the dataset.

7 FUTURE SCOPE

The four enhancing qualitative characteristics are comparability, verifiability, timeliness and understandability. The characteristic of relevance implies that the information should have predictive and confirmatory value for users in making and evaluating economic decisions.

The usefulness of financial information is enhanced if it is comparable, verifiable, timely and understandable.

Enhancing qualities are characteristics that are beneficial for the management and the investors for using the financial statements of the company in their decision-making process. Thus, these qualities in a conceptual framework

enhance the organization's fundamental characteristics.

Enhancing Qualities of Accounting

These include consistency, understandability and comparability.

Accountants use standardized practices so that information is recorded, calculated and analyzed in ways that are the same from period to period.
